# README:Blog Homepage Frontend

BrewedThoughts is a fully responsive blog homepage built using only **HTML5** and **CSS3**. It reflects a clean, minimal, and inviting design tailored for readers and writers alike. The layout is mobile-first and includes features like a hero section, blog post previews, a sidebar, and a dark mode toggle for enhanced user experience.

Features & Design Approach

- **Responsive Header**: Includes logo and navigation links that adapt to all screen sizes.

- **Hero Section**: Welcomes users with a warm introductory message or featured article.

- **Blog Posts Preview**: Showcases blog cards with images, titles, descriptions, and "Read More" buttons.

- **Sidebar**: Contains a category list, search box, and recent posts.

- **Footer**: Includes basic navigation links like About, Contact, and Terms.

- **Dark Mode Toggle**: Switches between light and dark themes using **CSS variables**.

- **CSS Hover Effects**: Subtle interactions for buttons and links for a smoother UX.

📁 Folder Structure

```
BrewedThoughts/
│
├── index.html      # Main HTML file containing the homepage layout
├── style.css       # Contains all custom styles, layout, and media querie
│── [dummy images]  # Images used in blog post previews, hero section, etc.
```

Design Choices

- **Colors**: A soft, neutral palette with shades of **beige**, **light brown**, **off-white**, **black**, and **nude pink** to create a warm and elegant reading experience.

- **Typography**: Custom fonts from Google Fonts for readable and aesthetic text.

- **Layout**: Utilized **Flexbox** and **CSS Grid** for clean alignment and spacing.

- **Responsiveness**: Media queries ensure smooth layout on mobile, tablet, and desktop devices.

How to Run the Project

Clone or Download the project:

git clone https://github.com/Hareem123Javed/BrewedThoughts.git

Open index.html in any modern web browser (Chrome, Firefox, etc.)
No additional setup or dependencies are required.
